AT denotes an activation tag dissociation transposon within a
single line, ET an enhancer trap dissociation transposon, GT a gene
trap dissociation transposon, MT a mis-expressor mutator
transposon. 3 denotes a sequence derived from the 3'end of the
transposon, 5 denotes a sequence derived from the 5'end of the
transposon BESRC GARNet, ATIS project

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    US-09-495-714C-138
                                                         Sequence 2, Application US/09726345

Patent No. 6855521

GENERAL INFORMATION:

APPLICANT: Naval Medical Research Center

TITLE OF INVENTION: Serotype and Dengue Group Specific Flurogenic |

TITLE OF INVENTION: (TagMan) Assays Against the Respective C and |

TITLE OF INVENTION: No. 685521-Coding Regions of Dengue Virus

FILE REFERENCE: NC 82197

CURRENT APPLICATION NUMBER: US/09/726,345

CURRENT FILING DATE: 2000-12-01

NUMBER OF SEQ ID NOS: 16
SOFTWARE: PatentIn version 3.2
SEQ ID NO 2
LENGTH: 20
TYPE: DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Best Loc
